UVPowered WaterBottle

User Guide

Your new water bottle

Congratulations on purchasing your new PureStream water bottle. By purchasing this reusable water bottle, you'll know that you are doing your part to help reduce plastic waste.

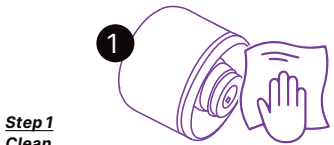

Please be sure to read this manual before use and follow all product instructions and safety considerations.

This water bottle is only effective if used as directed.

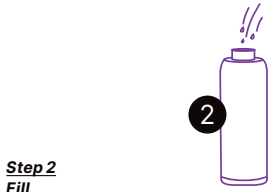

Attention

-  **Children should not use this product unsupervised.**
-  **Inspect water bottle for any defects before initial use.**
-  **Make sure lid is tightened before operating.**
-  **Do not put water bottle in freezer or microwave oven.**
-  **Do not submerge lid in water or other liquid as this will damage the water bottle.**
-  **Always choose a reliable, visually clear water source.**
-  ****This UV LED bottle is intended for water only. Wastewater and raw sewage are not acceptable water sources.**

Instructions for use

**Step 1
Clean**
Before first use, rinse inside bottle with soap and water. Unscrew lid, and wipe the glass surface with a soft cloth, ensuring that there is no dirt or impurities to interfere with the UV light.

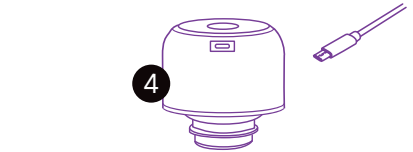

**Step 2
Fill**
*Fill bottle with clear water**. Ensure that the water resistant lid is securely fastened.*

**Step 3
Choose mode**
 **On Demand
PURPLE LED**
Prepare your drinking water with a touch of a button in On Demand mode. Tighten lid and press the power button for three (3) seconds. The indicator light will turn purple and On Demand mode will begin. After approximately 1.5 minutes the LED light turns off and your water is ready to drink.

 **Automatic
GREEN LED**
Keep your water bottle clean using automatic mode. While indicator light is purple, press and hold the power button for five(5) seconds. The indicator light will turn green and Automatic mode will begin. After approximately 1.5 minutes the LED light turns off and the UVC cycle will repeat every 6 hours.

 **To toggle between modes, hold power button until colour changes.**

**Step 4
Charging**
Open the USB-C charging port cover to connect the charger. The indicator light is red while charging. Light turns off when charge is complete. To prolong battery life, ensure that your bottle is fully charged at least every 6 months.

**** Please note, this system is NOT intended to convert wastewater or raw sewage to drinking water. Use only visually clear water in this device.**

**Testing by an independent lab, GAP EnviroMicrobial Services Ltd, demonstrated that the PureStream water bottle can achieve up to 99.9% (3-log) reduction of microorganisms.*

Contact Nature's Air & Water customer service for the data sheet.

Replacement parts

Silicone fittings need to be inspected regularly. If there is any damage or irregularity due to normal wear and tear, you should replace these fittings immediately.

Product warranty

Your PureStream water bottle is warrantied to the original user, to be free of defects in material and workmanship, for ninety(90) days from the date of purchase. The warranty does not include product damage caused by improper use, or normal wear and tear over the lifetime of the water bottle.

About us
